

O.S. Energy is operating a fleet of versatile offshore support vessels in the North, Baltic and Irish Sea from our offices in Newcastle (UK) and Glueckstadt (GER).

We are a young and rapidly growing company looking for ambitious employees willing to develop a sustainable shipping company with us.

We are looking for a

Junior Technical Superintendent

Job Description:

- Monitoring and maintaining the planned maintenance system (PMS)
- Supervising the technical reporting of the fleet
- Arranging of and supporting class inspection, CMID renewals and vettings
- Supporting planning and execution of docking periods
- Assisting with and planning of project specific refits and modifications
- Arranging of spares and being back- up for the senior superintendents

You provide:

- Degree level qualification in Marine Technology/Ship Management or related subject
- EOOW qualification with experience on seagoing vessels
- Proficiency in Microsoft Office and equivalent
- Excellent communication skills and verbal and written English to a good standard.
- Experience in similar role in the maritime industry or supply chain
- Demonstrate flexibility and interest to develop new skills and complete challenging projects and requirements such as vessel re-fit and modifications.

We offer:

- A forward-looking employment in full or part time
- Flat hierarchy and flexible working arrangements
- Good atmosphere in a young and ambitious team
- Home-Office
- Challenging and exciting projects within the offshore renewables sector
- Career opportunities
